

Impact-Rated Products

THERMA TRU®
DOORS

Tough when you need it. Beautiful always.

Therma-Tru offers Impact-rated doors and glass that can be used to meet high-wind and coastal region codes and regulations, offering excellent performance in extreme weather conditions while providing added protection.

Step 1: Use the map as a guide to find out if you need product for WBDR or HVHZ.

Always confirm building code requirements in your area before buying.*

Step 2: Use the icons to find available Therma-Tru® product options in this brochure.

Designed to withstand wind forces up to 167 mph (DP-50). (ASTM E 1886 / ASTM E 1996)

Designed to withstand wind forces up to 175 mph (DP-55). (TAS 201 / TAS 203)

 **WBDR / HVHZ Option:** Look for this icon to find door and sidelite styles that can be configured for WBDR or HVHZ.

Step 3: Verify that there is a Therma-Tru product approval specific to your area for the door system configuration before buying.*

Step 4: Make sure the product is installed in compliance with the product approval to meet building codes.

The performance of your door system depends on how it is installed. Proper installation is required to comply with building codes.

*Product approvals show that the door system meets applicable codes when selected, assembled and installed as instructed. Note: See your Therma-Tru seller or visit www.thermatru.com for product approvals and installation instructions. Always confirm building code requirements in your area before buying. Follow weather and news reports to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.

Constructed to help protect the interior of the home from flying debris and high winds associated with tropical storms and hurricanes, these products are tested to meet codes and regulations in coastal regions, including parts of Florida, Texas and the Carolinas.*

Impact Doors

Feature a built-in 24-gauge steel plate lining.

Impact Glass

Features special laminated glass construction.

Impact-Rated Internal Blinds

Features laminated glass construction and a durable, paintable aluminum lite frame with a flat profile aesthetic cover for a simple look.

Impact Lip-Lite Frame

Features durable, paintable aluminum construction. An attractive scrolled profile gives a thin, sleek appearance and a screw channel cover helps hide unsightly screws.

Available Glass Shapes

Blackstone®

Clear curved bevels, rainglass and coming.
