

Light control at your fingertips.

Enjoy the privacy and convenience of a cordless blind enclosed between glass. Control the desired level of light and privacy with the simplicity of a single handle.

Top: Smooth-Star, Clear Glass with Internal Blinds, Door – S829
Bottom: Internal Blinds Single-Hand Operator

Internal blinds shown in open-faced unit.

Improved design and functionality.

1 Gear Pulley Operating System

Use of a cog belt and inclusion of ball bearings provide a durable, smooth range of motion and help to reduce wear on the strings.

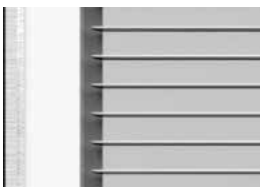

2 Cord-Winding Device

The length and slightly tapered design allows the strings to spool evenly without overlapping, helping to prevent uneven blinds.

3 Single-Hand Operator

Attached with four magnets to provide a strong connection to the unit to reduce the potential of the handle becoming detached.

4 Privacy Bar

Covers the gap between the ends of the blind slats and the edge of the unit to eliminate visibility into or out of the home, as well as reduce sun glare.

Tru-Advantages

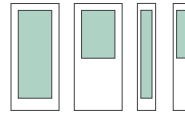

■ Generates new market opportunities.

- Low-E glass option expands line of internal blinds to satisfy more job requirements.
- Meets homeowner needs for energy efficiency, privacy and light control.

■ Safety, energy efficiency and privacy.

- Cordless design delivers a kid- and pet-friendly privacy option with a clean, modern appearance.
- Blinds remain dust free, and glass is easier to clean than traditional blinds.
- Energy-efficient Low-E glass can help reduce energy costs.
